Nurseries & Allotments

Silage Bales & Clamps

Vegetable Gardens

Strobe-like flashes from holographic reflective material

Fishing Lakes & Ponds

HawkEyes are designed and manufactured to operate in the lightest breeze. It will provide long service and withstand more extreme weather conditions if you follow these simple guidelines:

1

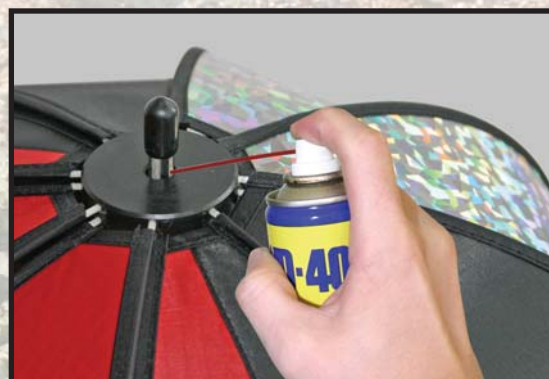

Use super glue to fix the vanes into the plastic bearing as indicated.

Ensure the glue penetrates into the holes before insertion of the vane stem

2

Lubricate the bearing discs with WD40 or oil as indicated after assembly.

Ensure the bearing discs are free to move, gently test by spinning unit by hand

3

Firmly fix HawkEyes to a stake using cable ties.
